## SUMMARY

Innovative Software Engineer with 3.5 years of experience in front-end development, specializing in ReactJS. Developed responsive web applications and implemented state management, optimizing data handling with Redux and improving application performance. Seeking Frontend ReactJS Developer role to drive seamless user experiences and efficient data interactions at IT through expertise in ReactJS and API integration.

---

## EXPERIENCE

### Software Engineer

#### Antier Solutions

December 2021 – Present, Mohali

- Developed and maintained responsive web applications using ReactJS.
- Implemented state management using Redux for optimized data handling.
- Engineered and integrated RESTful APIs to facilitate seamless communication between client-side ReactJS applications and backend services, enhancing data flow efficiency.
- Improved application performance through optimized rendering and lazy loading.

---

## PROJECTS

### Music Nft marketplace

- Engineered an NFT marketplace platform facilitating seamless transactions of digital assets.
- Implemented blockchain technology to ensure secure and transparent transactions.
- Designed and developed a role-based Admin dashboard for the same.

### Crypto Payment SDK

- Engineered a crypto payment SDK using reactjs, enabling seamless cryptocurrency transactions for different blockchains.
- Integrated advanced security protocols and scalability features, supporting over 50 cryptocurrencies and enhancing transaction speed.

### Crypto Wallet extension

- Built a secure wallet extension that supported multiple cryptocurrency wallet creation, importing wallets, seamless transactions, and swap functionalities, featuring advanced encryption standards and a user-friendly interface.

### Admin/User dashboards

- Developed multiple admin dashboards, user panels, and merchant panels using React and Redux for efficient data management.
- Implemented interactive graphs and charts to visualize complex data insights, improving decision-making for stakeholders.
- Optimized Redux state management for better performance, reducing API calls and improving application responsiveness.
- Enhanced UI/UX by integrating dynamic filters, tables, and real-time data updates for a seamless user experience.

### E-commerce

[mern-grocery-store-frontend.vercel.app/](https://mern-grocery-store-frontend.vercel.app/)

- Developed a full-featured e-commerce platform with separate user and seller dashboards using React, Node.js, Express, and MongoDB.
- Implemented secure user authentication and authorization using JWT, with role-based access for buyers and sellers.
- Integrated Stripe API for real-time payment processing and transaction tracking.
- Built dynamic product listing, order management, and cart functionalities with Redux Toolkit for seamless state management.

---

## EDUCATION

### Masters in Computer Applications

Chandigarh University • Chandigarh • 2024 • 8.1 CGPA

### Bachelors in Computer Applications

Chitkara University • Rajpura • 2022 • 9.44 CGPA

---

## SKILLS

JavaScript, TypeScript, React, Redux, Web3, Git, Html, CSS, Stripe
